

# MAYEKAWA U.S.A., INC.

## TECHNOLOGY

Mayekawa Mfg. Co. provides a wide variety of thermal engineering solutions to meet most of today's ecological challenges. Having over 100 years of experience, we have been able to control and manipulate most of the Natural Refrigerants (Ammonia, Carbon Dioxide, Water, Air, and Hydro-Carbon) to almost any temperature. Mayekawa is known for its design towards "green". Therefore Mayekawa is providing low CO2 emission equipment to contribute in achieving a "low-carbon society".

## COMPETITIVE ADVANTAGE

Mayekawa's competitive advantage in the market stands out for several reasons. One of the reasons is the ability to analyze an application and find a custom thermal solution that best fits the application. We have a team of highly trained engineers that specialize in energy saving designs to specifically meet the customer demands.

## RECORD OF SUCCESS

Mayekawa Mfg. Co., Ltd, Japan won many awards in the area of ecology & energy savings. The latest awarded was by the "Environmental Minister's Commendation for Activities to Prevent Global Warming 2008 for the development of energy saving and natural refrigerant in compressor packages. This award was presented to the individual or organizations who made remarkable contributions to global warming prevention.

## OPPORTUNITIES FOR PARTNERS

As a manufacturer, Mayekawa has great interest in creating and improving energy saving opportunities. In this effort, we look forward to future partnerships with engineering companies while communicating directly with end-users. The dynamics of working as a team with contractors create the right synergy in providing the best possible solutions for our customers.
