

Torishima Pump Mfg. Co., Ltd.

COMPANY DESCRIPTION

Torishima Pump is a manufacturer specializing in everything to do with people and water. We offer the full range of products and services for water including pumps, transport, treating and controlling (for water and other liquids) as well as systems and engineering. Torishima Pump aims to serve society through our environmental and ecological products and services. Torishima Pump is committed to sustainable development goals, offering products that both raise standards of living and improve environmental stewardship.

OPPORTUNITIES FOR PARTNERS

Torishima Pump offers the highest quality pumps and services for water, desalination, and energy worldwide. In North America, we have a branch office in Worcester, Massachusetts. We are looking for business partners who are interested in our products for Renewable Energy.

INTRODUCING OUR PRODUCTS

Since its establishment in 1919, Torishima Pump has been supplying and developing pumps and machinery that transport the liquids essential for social and economic development. In response to current market and society needs, we have established new operations in four priority areas including:

- High Technology, Engineered Pumps (development, manufacture and sales of pumps with high added value for power / desalination / general industries / water transmission / sewerage / flood control)
- Projects (EPC for pumping station / balance of plant / water treatment)
- Renewable Energy & Environment (wind power generation, mini & micro hydro generation, woody biomass gas cogeneration, sewage transport and treatment, resource recycling)
- Services (operation & maintenance, solution provider)
